HIV SYMPOSIUM
Clinical Challenges in HIV/AIDS Care 

30th September 2018
AIIMS, JODHPUR

All India Institute of Medical Sciences (AIIMS) Jodhpur is one of the SIX NEW AIIMS established by the Ministry of Health & Family Welfare, Government of India under the Pradhan Mantri Swasthya Suraksha Yojna (PMSSY) with the aim of correcting regional imbalances in quality tertiary level healthcare in the country and attaining self-sufficiency in graduate and postgraduate medical education. The institution is established by an Act of Parliament on the lines of the original All India Institute of Medical Sciences in New Delhi which imparts both undergraduate and postgraduate medical education in all its branches and related fields, along with nursing and paramedical training to bring together in one place educational facilities of the highest order for the training of personnel in all branches of health care activity.

The Department of Medicine AIIMS Jodhpur is pleased to organize a one-day academic activity "HIV Symposium: Clinical Challenges in HIV/AIDS Care" on 30th September at AIIMS Jodhpur Rajasthan. With the ever increasing advances in the field of HIV/AIDS, it is difficult for the practicing clinician to keep pace with it. Various aspects of care of HIV infected individuals as well as issues relating to pre as well as post exposure prophylaxis are quite challenging not only for the primary care physician, but also to physicians dealing with infectious diseases. The Symposium will give an opportunity to participants to learn and interact with internationally acclaimed faculty.

The symposia aims to enhance knowledge about HIV medicine and thus improve the quality of HIV care in primary care setting.
