PROPRIETARY CERTIFICATE Microdacyn60® Wound Care Hydrogel

This is to certify that Microdacyn60® Wound Care hydrogel is a proprietary product marketed exclusively by Oculus Innovative Sciences worldwide. Patents: US 8,062,500 / AU 2012201437 / US 7,090,753 / US 7,442,288 / EP 1 293 481 / IN 249157 / MX 319100 / US 8,323,252 / CA 2,602,522 / HK 1116340 / CN 101189017B / AU 2007205861 / JP 5449780

Microdacyn® Hydrogel is an electrolysed hydrogel intended for use in the debridement and moistening of acute and chronic wounds, ulcers, cuts, abrasions and burns including those located in any human cavity such as the oral, nasal or ear. Sodium hypochlorite and hypochlorous acid are ancillary substances may have a local antimicrobial effect. Through reducing the microbial load and assisting in creating a moist environment, it enables the body to perform its own healing process. Microdacyn® Hydrogel can be broadly applied within a comprehensive wound treatment..

Maximum efficacy

Through its antimicrobial effect, the Microdacyn60® Wound Care wound-irrigation hydrogel ensures a reliable reduction of microbial load and, with regular use, prevents a recurrence of pathogen reproduction. Microdacyn60® Wound Care also facilitates the mechanical removal of microorganisms and cell debris.

Maximum tolerance

The essential component of Microdacyn60® Wound Care is hypochlorous acid (HOCl). It is an important constituent of our innate immune system and is formed and released by the macrophages during phagocytosis as a substance produced naturally in the body. This results in significant advantages over other wound-irrigation solutions and antiseptic solutions: because of the process that is also used in phagocytosis, the reaction of Microdacyn60® Wound Care is directed exclusively against single-celled microorganisms and not against more highly organized cell structures (such as human tissue).

Microdacyn60® Wound Care has no known side effects on human cells
Microdacyn60® Wound Care is not cytotoxic
Microdacyn60® Wound Care does NOT trigger any early aging processes

Respectfully Submitted,
