Annexure 2 (Format of price bid)

Annexure 1

S.No.	Item Name	Qty.
1.	Shoulder Spreader, Left Bend	01
2.	Bone Retractor, Humeral Head	01

### Specification of General Shoulder Instruments (Posterior Shoulder Retraction System)

For the surgeon the approach is of key importance in shoulder surgery. The challenge arises from the regional complexity of anatomical structures and layers, which impede wide access to bony structures. The system hence which is solely dedicated and could facilitate deltoid retraction, humeral head exposure and glenoid exposure and thus allow a traumatic treatment should be there for use in practice.

The shoulder retraction system should come along with the following features and Benefits:

**Rounded edges:** the instruments should be designed according to the newest standards, rounded edges and soft tissues friendly.

**Prevent slippage:** The system should have the ring design for the ring retractors which should prevent slippage.

**Optimized working space:** The ring retractors should have a very distal angulation which should enable the surgeon to provide a better working space

**Facilitate reaming:** The Shoulder retractor system should have the design of drop-shaped ring retractors to create a comfortable working space for the reamer and additionally guide the reamer

**Optimal grip:** The shoulder retractor system should have spreaders for glenoid exposure which should have an optimal sized ring on one end and small teeth on the other end for optimal grip.

None the less the Shoulder Retraction System should be having a Delta Retractor which should facilitate the surgeon for gentle retraction of the deltoid muscle in order to expose the proximal humerus and for subscapularis retraction in order to expose the anterior glenoid rim.

**The Shoulder Retraction System:** should also have a Delta Retractor, pointed for gentle, superior retraction of the deltoid muscle to enable the surgeon lever it against the acromion, where by the instruments pointed tip should slide under the deltoid to expose the subacromial space.

**The Shoulder Retraction System:** should also have a Ring Retractor, delta shaped to allow surgeon achieve stable deltoid retraction. The ring should engage the greater tuberosity, thus help the surgeon from preventing distal slippage of the retractor.

**The shoulder retractor system:** should be having a feature which should allow Humeral Head Exposure as well. Hence the system should have Ring Retractor and Ring Retractor, narrow the ring retractors should allow the surgeon for moderate, posterior humeral retraction in order to release the anterior capsule, inferior capsule, the sub-scapularis and enable the surgeon expose the axillary nerve. The retractors should have a very distal angulation which should provide a better working space.

**The shoulder retractor system:** should come along with Bone Retractor, Humeral Head for exposing the humeral head i.e. to obtain anterior dislocation of the humeral head. This retractor should function similar to a shoehorn.

**The shoulder retractor system:** should come along with Ring Retractor drop-shaped and drop-shaped, narrow to create a comfortable working space for the reamer. The retractor should facilitate orthogonal glenoid exposure and should provide better retraction of the humeral head and should facilitate.

**The shoulder retractor system:** should help have Glenoid Exposure through the ring retractor and the system should have slight distal angulations with Shoulder Spreader, left bend and Shoulder Spreader, right bend for lateral retraction of the humeral head in order to gain access to the posterior capsule. Also the system should help surgeon for distal retraction of the humerus in order to gain access to the subacromial space and for posterior retraction of the humerus in order to gain access to the subacromial space.

**\*Note:-**

1. Recommended Make- Depuy Synthes, Smith Nephew and Medtronic.
2. Company should be at least in its 5 years of operations at the date of submission of tenders in Indian Market.

**INQUIRY NO. Admin/Gen/03-03/2021-AIIMS.JDH**

3. Bidder must enclose original literatures & technical data sheet in the support of the technical bid.
4. Physical demonstration should be as per the requirement of user department.
5. Instruments quality should meet the international standard.
6. Company should provide authorization certificates from local dealer.
7. Vendor should quote for all the items of same manufacture.

**Note: - The supplier may be asked to arranging demonstration of their Items for which rates have been quoted, to the AIIMS Jodhpur, if required. The expenditure incurred for demonstrating the items will be borne by the supplier.**

**[On the letterhead of firm]**

**ANNEXURE "2"**  
**PRICE BIDFORM**

To,  
Administrative Officer,  
AIIMS, Jodhpur.

Dear Sir,

1. I/We ..... Submitted the quotation for Enquiry No. "QUOTATION FOR GENERAL SHOULDER INSTRUMENTS (POSTERIOR SHOULDER RETRACTION SYSTEM AT AIIMS AGAINST THE INQUIRY NO. Admin/Gen/03-03/2021-AIIMS.JDH" DUE ON 23.06.2021 03.00 PM for General Shoulder Instruments (Posterior Shoulder Retraction System. at AIIMS Jodhpur".

2. I/We thoroughly examined, understood and accepted terms & conditions given in the enquiry document, failing which my quotation will be rejected out rightly.

3. I/We hereby offer to supply at the following rates.

S. No	Particular	Qty.	Quoted Make	Price/Unit Exclusive of GST (INR)	GST/ Other Taxes	Price/ Unit Inclusive of GST (INR)	Total Cost Inclusive of GST (INR)	MRP
1.	Shoulder Spreader, Left Bend	01						
2.	Bone Retractor, Humeral Head	01						

**Note:-**

- The Bidder must quote single Make.**
- The bidder must quoted their quotation only in above said format on the letter of firm otherwise quotation will be **REJECTED**.
- Catalog must be attached with quotation for technical evaluation.
- The supplier may be asked to arranging demonstration of their equipment for which rates have been quoted, to the AIIMS Jodhpur, if required. The expenditure incurred for demonstrating the items will be borne by the supplier.
