UNDERSTANDING HIGHER MAGNIFICATION AND EVIDENTIARY CLINICAL PHOTOGRAPHY IN DENTISTRY

A ROAD LESS TRAVELLED

04TH & 05TH DECEMBER, 2021

9TH CDE PROGRAM

**ORGANIZED BY
DEPARTMENT OF DENTISTRY**

Dear Colleagues,

On behalf of organizing committee, we take great pleasure in inviting you to the CDE Program "UNDERSTANDING HIGHER MAGNIFICATION AND EVIDENTIARY CLINICAL PHOTOGRAPHY IN DENTISTRY- A ROAD LESS TRAVELLED "

1) The operating microscope greatly enhances ability of a clinician to view the smallest detail which may be invisible to naked eyes by magnifying the vision up to 25 times. It serves as an imperative tool which is useful both in diagnosis and curative treatment. It ensures better treatment outcome by visual enhancement of the operating field.

2) Photographs serve as an important source of record keeping as well as medical education. Clinical photography is a vital skill that every dental practitioner must master. This field of dentistry is becoming increasingly popular amongst clinicians. To ensure the good quality of images being taken, understanding of the equipment and photography settings is paramount.

The program aims to enhance our knowledge regarding the application and uses of Clinical Photography and Micro-dentistry and magnification in everyday clinical practice.

Date	Event	Timing
04.12.2021	Break fast	08:00 am to 09:00 am
